

According to the **Global Innovation Index 2015** (GII), the Republic of Moldova has been identified as one of the rising innovators in Europe, being in the **TOP ten best-ranking** economies among the low-middle income countries (34 in total).

It performed above 75% of the economies in the GI in Knowledge and technology outputs and Creative outputs, grace mainly to the **high numbers of utility model applications and trademark registrations**.

These results are due to the efforts of the Government of the Republic of Moldova and the State Agency on Intellectual Property in promoting knowledge about intellectual property rights and implementing the **National Intellectual Property Strategy up to 2020**.

As from January 1st, 2016 the Republic of Moldova, as designated country, received **114535 trademark applications, of which 64,1% (73456)** are international applications filed under the:

- Madrid Agreement - **45569** applications,
- Madrid Protocol - **27887** applications.
